

Harkila Spring/Summer: our Picks

Like many of you, I recently received Harkila newsletter showing the new products for [Spring and Summer](#) 2017. Obviously there are many nice things, but I decided to play around with the catalogue and choose 4 items (2 for men and 2 for women) which, for some reasons, I believe to be the most attractive.

Let's start with [men](#), it was difficult to pick only two things, as there are so many garments for them but my picks are the followings:

- [Herlet Tech Trousers](#). Why do I like them? Because of the insect shield meant to keep ticks and other bugs away, interesting uh?
- My second choice is a pair of boots, [PH Range GTX ®8"](#), why? Because it is hard to finding good boots suitable to hot weather. People, including myself, usually end up using the same pair of boots all year around but wishing to own something cooler and lighter for the summer.

My choices for men

[Women clothes](#): whereas there is less variety, for me was

even harder to choose! And, I confess, my choice, was quite instinctive but... being a woman I have all the rights to be emotional... at least sometimes! Well I immediately fell in love with the

- [Sandhem Lady Fleece Jacket](#) described as wind resistant. Why do I like it? It looks incredibly “soft” and softness is a quality I really appreciate in clothes. It also looks warm and comfy (stretch inserts). It comes in brown and green, both the versions look nice, but I might be a little partial to green because it would perfectly match
- [the Selja Lady Shirt](#), checked version. I have a thing for checked shirts and its green and purple tones make it hard to resist!

and for women

All the garments specifics, details and additional pictures can be found on the [Harkila's](#) website.
