

How to fill out the questionnaire

Unfortunately we need you to fill out a [questionnaire](#) for each dog and, unfortunately, we are also very interested in those of you who own and handle many dogs. The questionnaire was created ONLY for dogs used for shooting or competing in field trials (pointing dogs, spaniels and retrievers). These dogs must be purebred and have a pedigree. If your gundog is a pet, or a show dog, I am sorry but he cannot be included in our sample. The questionnaire might seem long at a first sight, but you can fill it out in a few minutes. We decided to have only a few compulsory questions, to make you feel at ease: you can skip the questions that do not apply to your situation, or that you do not feel comfortable about. Remember, however, that the questionnaire can be as anonymous as you like, and all your answers will be stored respecting the laws on personal privacy and will not be passed on to other people. The more details you will be giving us, though, the more you will help this research and my dissertation, I will therefore appreciate detailed and honest answers. Please specify the units of measure in open questions (year, months, hours...). An e-mail address, whereas not compulsory, is equally appreciated in case we need any clarifications concerning your answers. We also need an e-mail if you wish to be included in the drawn for the [prizes](#) we are giving away. For those who prefer working on a printed version of the questionnaire, a [pdf file](#) can be downloaded, printed, given to those who do not have any internet access and then [emailed](#) back to us.

If you wish to receive a feedback about the outcomes of this survey, please let us know: we will send you a report at the end of the project!

We will also be grateful if you could give visibility to the project by sharing or forwarding these pages, or the

questionnaire link, to anyone who could be interested or otherwise able to help us in this research.

The team behind the project

Some of you already know me, but I am going to introduce myself again to make you feel at ease. My academic background is the following: I have a Laurea Specialistica (equivalent of an MA) in Foreign Languages and Literatures (British Literature) earned with a grade of 110/110 cum laude from the [University of Pavia](#) (Italy); a Certificate of Asian Studies earned with Distinction from [Mount Holyoke College](#) (Massachusetts, USA) and I am going to graduate in [Veterinary Medicine](#) from the University of Milan (Italy). I also attended the Italian Veterinary Acupuncture Society School and several extracurricular courses on dog behaviour, neuroscience, wildlife management, writing, photography and more.

Work & Hobbies: I started writing about dogs and hunting in 2002, became a professional journalist in 2005 and published two books on dogs. At the moment I am still freelancing for Italian and foreign magazines and my pieces can be read in

each issue of Sentieri di Caccia, Beccacce che Passione and Cinghiale che Passione. I have been active around dogs since my childhood, volunteered at a no-kill dog shelter for five years and got my first English Setter in 1999, my first shooting license came in 2004. Years have passed, but I still enjoy the countryside, training, trialing, rough shooting and anything gundogs related. I currently manage the blog [Dogs & Country](#)

My supervisors in this project are Professor [Silvana Mattiello](#) and Professor [Clara Palestini](#), one of the few veterinarians who obtained a diploma from the [European College of Animal Welfare and Behavioural Medicine](#). Both teach and research at the [School of Veterinary Medicine](#), University of Milan (Italy).

Why and how to benefit from the Gundog Research Project

[The Gundog Research Project](#) has carefully been designed with dogs, hunters and trialers in mind. Understanding how the dogs are managed is a preliminary, yet a fundamental step to discover which practices are the best and which ones could be

implemented. Hunters and all the activities related to hunting and shooting are often misunderstood and criticized by public opinion: a change is needed and hunters, as well as gundog trainers and handlers, can give an important contribution. Gundogs need you and your answers matter!

As animal welfare has been increasingly becoming an area of public concern, we think that hunters, gundog lovers and gundog related organizations would benefit from being “proactive” (showing a positive image of fieldsports) rather than reactive (trying to defend themselves from accusations). Your participation to this project can help outsiders to understand that you care about your dog’s welfare (I am sure you do!) and also help them understand the gundogs’ true nature and deepest needs. At the same time, your answers will help us to identify the weaknesses that might exist in gundogs management and see if and how they could be implemented. Previous studies on working and shelter dogs, in fact, tell us that very minor changes in management can reduce the dogs stress levels, improve their health and... also enhance their performance in the field!

Ps. We are working on getting a few [prizes](#) which will be drawn among those filling the survey.
