

# The Gundog Project

[In italiano qui](#)

The Gundog Research Project is a scientific research focusing on gundogs actively used for hunting and field trials. The project has been tailored on pointing dogs, but we are accepting contributions from spaniels and retrievers owners as well. The project stems from two elements: my love for gundogs and, on a more practical side, the need to write a research dissertation to graduate in Veterinary Medicine. Writing a dissertation is mandatory in Italy and, as it might require months of research, I opted to devote them to something I like, and from which animals and humans could benefit . Dogs have always played a huge role in my life, and certainly helped me to grow into a better person, this is how I am trying to give them something back.

Animal behaviour is intimately linked with animal welfare which, on its turn, is affected by animal management. Most of the animal welfare studies carried on so far, focus on farm animals. Furthermore, working dogs such as hunting and field trials dogs, cannot even be considered “pets”. They are canine athletes, they have their own peculiar needs and they are among the few dogs that can truly be considered working animals. As far as my tutors and I are aware, there is no scientific literature available on hunting and field trial dogs management and welfare: the studies we could find are centered on military, police and shelter dogs and on dogs for the blind. Feel free to [e-mail us](#) if you want to know more about the project scientific design and about the scientific literature behind it.
